Geo fencing, also known as "safe zones," can be set Up from the mobile app: you can add, edit or remove a Geo-Fence area. You will receive alerts when entering or exiting a Geo-Fence area.

Create Geo-fence Safezone

Tap On The Map To Set A Zone

Adjust The Size

Name The Zone

Notes:
Recommended GPS radius of 1000 feet or higher to reduce false alerts.
You can setup multiple Geo-Fence locations as needed.

SecuLife®

1) Turn on the watch and ensure it has a signal.
2) Open the map on the mobile APP, click the location, and then it will show your child's location on the live map.

Notes:
If the watch is indoors, it usually will position itself via LBS or WIFI, a slight deviation is possible; this depends on the distance between the watch, the Network Towers Base Station, and the type of building structure.

FAQ:

If you have saved the phone numbers and the watch indicates that the device can not connect to the network.

1) Is there a signal after inserting the card? Please check if the watch rings when receiving a phone call.

2) Check whether the watch is on or not. (Note: before using the APP, the watch must be on)

3) Check whether the watch ID matches the ID on the tags.

5) If it is still not working, please get in touch with our support team online

- When you call the watch, it alerts you that the number you have dialed is busy; please try again later.

1) Is there any signal after inserting the card?

2) Please check that you have saved phone numbers on the Mobile App.

3) Check If you have turned on the DO NOT DISTURB in the App and set a time; if yes, please switch to OFF.

- The positioning function is not working.

1) Go outside with the watch and try again.
(This is for GPS functions only)

2) Once the watch goes into SLEEP MODE, it will switch to SAVE POWER MODE, which means the function of uploading data is OFF.
You can refresh the position by shaking the watch to wake it up.
